

GoDaddy Web Build-A-Thon with smartinternz:

Topic domain: **Education-Domain**

INTRODUCTION

I created this website on education domain to help student in this covid-19 pandemic in efficient way. At this time students are learning from home and they are facing problem to making proper notes to study form home and preparing for exam. I thought to provide a platform for them to download proper handwritten notes which will help them to study more effectively.

Here students can ask me questions or they can visit to other official site as needed. I will increase the resources on website as we will come up with the content.

LITERATURE SURVEY

Existing problem

Previously students use to visit school and make there notes in class and they will take the help of those notes to prepare for there exam. But as the school is shifted to online mode every students are facing problem to create the notes properly. Sometimes due to week interest connectivity they are unable to make there notes properly.

Proposed solution

As we have create this platform for students to provide the notes for all board appearing students. They can easily download notes of there needs. They can also ask query regarding there wants.

THEORITICAL ANALYSIS

This website is design in very simple way and easy user interface. There is no need to sign up to avail any benefits on the websites. I have structure it in a very simple way that they can easily download there required things. I have also provided external links to check the official website of educational boards.

RESULT

As the website is build for students form grade 9 to 12. They can easily grab the handwritten notes form it. It is always very demanding to get the notes of classes. It may be helpful for new educator also to get the idea of providing notes to students. I have also decided to provide some previous year questions to get the idea from it.

ADVANTAGES & DISADVANTAGES

There is a lot of benefits to the students by getting quality notes form here. There are some disadvantages also that students may not make there own notes which is more beneficial to them. I have created this site to just take the idea form the notes and make there own notes.

APPLICATIONS

Students can use it in there school life to prepare for exam and also it will help students to score good marks in exam. It will be very benefiting for each students. Students can get a lot of information form the website even we will provide the facility to get the counseling of students. We will also help students to get the good marks in there exam and also to prepare for competitive exam.

CONCLUSION

This website is build with many plugins and the help of mentor. This project takes few days to get completed and it is possible because of the dedicate mentor to us. There is lots of phases which can be understand during the building of this project.

FUTURE SCOPE

This website is build by looking at the need in future. As the situations are getting tough each and everyone can get the help form it. This is going to be the best for every students to get the notes and other material for study. I will add some more resources to it such that it will help students to gain each and everything required for the preparation for exam.

I will try to upload the notes of other creative teachers which can help students to gain more information. I will try to provide the better resources to get prepared for there exam.

BIBILOGRAPHY

I thought to work on this project form the long time but because of lack of resources I was not able to do that. But finally it comes toward everyone with the help of smartinternz. I have used lots of resources to come up with it. It is really a awesome experience for me to create something for students which help them gain something which is missing at that time.
